

UNIVERSITÀ  
DEGLI STUDI  
DI MILANO

**Chapter 1**

**Chapter 2**

## Section 1 : Introduction

This pdf file is just an example for coding with fpdf library and testing potential functionalities. This is for automation in pdf creating that can be beneficial for several incentives.

University of Milan offers several undergraduate and graduate programs in vast number of areas. This university located in Milano, Italy. It has 31 departments which are remarkably interdisciplinary in their approach. Departments are the University organizing structure for scientific research, research and related educational activities. They are the sites where general strategic objectives are translated into specific action, where the integration of the knowledge and skills, even across departments is initiated and where research quality assurance processes are implemented.

Master of Science in Data Science and Economics program in University of Milan aims to provide a modern and effective educational programme for students interested in data science issues with special focus on applications to the economic field. DSE strongly leverages STEM disciplines to provide a solid, coherent training on quantitative and methodological methods and tools of Information Technology (IT) as well as statistics and mathematics to interpret and analyze complex phenomena in the field of economy and business.

## Section 2 : Pictures

This pdf file is just an example for coding with fpdf library and testing potential functionalities. This is for automation in pdf creating that can be beneficial for several incentives. In this chapter some pictures are attached.
